

**Scan material like clothing, food, water or even air quickly and safely with a RHandy.**

- Fully automatic and easy to use
- Light weight
- Easy to read backlit display
- Very quick response time with variable alarm tone

# RHANDY

## HANDHELD RADIATION DETECTION SYSTEM

### Fully Automatic and Operator Friendly

The RHandy has been designed to allow a fast and easy inspection of any material for the presence of radioactivity whether it is clothing, food, water or even air. In only seconds the RHandy is ready for use. When radiation is detected, an audio tone will be activated. In addition the display will show the increasing radiation levels.

**Rad/Comm has designed an easy to use fast responding portable radiation detector providing early warning of the presence of radiation contamination that anyone can use.**

## RHANDY Specifications:

### Mechanical:

Five push button actuation

Thru-hole arrangement for maximum radiation energy penetration

Thru-hole for audio alarm

### Display:

3,8 x 4,4 cm backlit LCD display displays radiation level in selected unit of measurement, battery level

### Battery:

Li Ion battery, rechargeable in 4.5 hours with charging LED indicator

### Energy Response:

From 30 KeV to 1.5 MeV

### Size:

Height: 2,97cm

Width: 5,97 cm

Length: 11,04 cm

Weight: 200 g
